Thrice Afflicted.

Thrice within a few weeks has the grim monster—death—invaded the threshold of the afflicted parents and each time removed from earth a loved one, leaving them but one child. Surely the hand of Providence works in a mysterious way, but we are told that he doeth all things for the best. To the afflicted family The Virginian extends its warmest sympathies in this, the saddest hour of their life. The remains arrived home last night and the funeral will be conducted from the residence, corner of Holliday and Pearl streets, this afternoon at 5 o'clock.

Portsmouth failed to score until the third, when, with two men out, Knox got first on being hit by a pitched ball and scored on Reed's two base hit. Just then the rain fell very heavily and the game was postponed on account of wet grounds. There will be two games this afternoon, commencing at 2:30 o'clock.

JOURNALISM UP TO DATE.

Some Changes That Will Take Place in Newspaper Offices Very Soon.

Within a year or two there will be important changes in the mode and means of newspaper making.

The reporter will send both description and picture by telegraph, and the reporter of the future is going to draw as well as to write.

The editor, whether in his office or temporarily residing at a distant point, will telegraph his orders and ideas, and by an improvement now being perfected he will receive telegraphic proofs in return.

Writers on newspapers will become users of a machine in process of construction by which the present typewriter keyboard will not only set their ideas into print, but will also simultaneously put them into type, eliminating the machine typesetter as the machine itself has eliminated the hand compositor and as the steam press eliminated the hand press.

These are only a few of the changes in the near future of journalism. These and others bound to come will not injure any one, but will divert to other profitable fields labor now occupied intermediately between the writer and the press. By cheapening the cost of producing a newspaper these changes will improve the business and make it more beneficial to mankind.—Chicago Times-Herald.

NEW EYEBROWS.

A London Perfumer Who Will Make You the Real Article.

We learn from French sources that a London perfumer has found a new way of fixing up eyelashes and eyebrows. Instead of painting them in the usual vulgar old style he puts the genuine article there, and professional and amateur beauties of the great city are flocking to him to be made just too lovely for anything. The operation is said to be extremely delicate, though by no means painful. He takes a hair from the head of the beauty, or, if she does not like precisely the color of her own hair, he takes one of any other color that she likes, threads an extremely fine needle with the hair, runs it along inside the skin of the eyelid, sewing sailmaker's fashion, but leaving the loops sufficiently long to enable him to cut them afterward, so that they will form a range of beautiful fringe and look perfectly natural. For eyebrows he does the same thing, but the eyebrow operation is of course less delicate.

Arched eyebrows, bushy eyebrows, straight eyebrows, crooked eyebrows, all sorts of eyebrows, in any color or shade or form, this wonderful perfumer makes for the ladies of London, and it is said that his success is something astonishing.—New York Sun.

Trilby Had Struck Vegetables.

The Trilby craze has even struck the vegetable world. In a bunch of radishes bought in Hanover market by Mr. Charles A. Worneth, night watchman at the Susquehanna Ice company's plant, was found a radish shaped distinctly like the front part of a foot, with five white toes sticking out. It was scarcely as beautiful as the foot which Little Billie made renowned by drawing on the walls of a Paris studio.—Baltimore Sun.

A Crew Rescued.

SAN DIEGO, CAL., July 6.—The British ship Marion Frazier arrived yesterday from New Castle, Australia. When abreast of Pitcairn Island she was hailed by natives, who conveyed letters from the crew of the Norwegian ship Fjeld, saying the Fjeld had been burned at sea and her crew had been in open boats for fourteen days before they reached the island. They were picked up from there by the British ship Centaur, bound for Great Britain. All hands were well when the Centaur left the island.

Weavers to Get an Increase of Wages.

PROVIDENCE, R. I., July 8.—Now that the big strike in the big worsted mills at Onevisey is all over, the managers of the mills affiliated in the manufacturers club, have agreed upon a raise of wages to be made when the light weight goods are put on the looms about the first of August. Weavers will get an increase of 7 1/2 per cent., and in all departments one half of the out down of 1895 will be restored.

A Good Recommendation.

LA FAYETTE, IND.—A Mrs. Jas. Fay living near this city claims to have been cured by the use of Simmons' Liver Regulator after five or six of the best physicians had pronounced the case hopeless.—Albert A. Wells, Your druggist sells it in powder or liquid. The powder to be taken dry or made into a tea.

Do not fail to see Dr. Week about your eyes. F. H. Gale.

Feed Tea at Mac's. Ice Cream at Mac's.

FOR DYSPEPSIA.
Indigestion, and stomach disorders, take BROWN'S IRON BITTERS. All dealers keep it. \$1 per bottle. Genuine has trade-mark and crossed red lines on wrapper.
